REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record does not suggest or disclose the claimed combination of method steps or apparatus/system elements, most notably:

as per independent claims 1,18,28 and 29, the claimed steps of "transmitting the second representative signal to the first device; and comparing the first representative signal to the second representative signal" in a "method for determining if a first and a second device are co-located", and the claimed apparatus/system elements for performing the above-claimed steps in a "system for determining if a first and second device are co-located";

as per independent claims 13 and 30, the claimed steps of "sampling the sample signal at the base station [or remote device] and responsively generating a second representative signal of the sample signal; determining if the base station and the remote device are co-located; and processing the data received by the base station [or remote device] if the remote device [or base station] is co-located."

2. The prior art is replete with so-called correlation analysis or more generally, signature analysis, to determine a remote object's location. See the attached PTO-892. One example of the prior art of record that should be mentioned in particular is Christ ('913). Claim 1 of Christ is reproduced below:

1. A method for locating an object within a predetermined area comprising the steps of:

Art Unit: 2857

- a) sensing a signal output by the object using a plurality of sensors disposed within the predetermined area;
- b) forwarding a plurality of received signal levels from the plurality of sensors to a central processor; and
- c) comparing the plurality of received signal levels with a plurality of reference values to determine a location of the alarm signal, wherein the step of comparing comprises performing a best fit analysis of the plurality of received signal levels with the plurality of reference values.

Missing from Christ, however, are the instant claimed steps (emphasized above) and the corresponding claimed apparatus/system elements for performing the steps.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick J. Assouad whose telephone number is 571-272-2210. The examiner can normally be reached on Tuesday-Friday, 6:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc Hoff can be reached on 571-272-2216. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
